DETAILED ACTION

Applicant's amendment dated 08/11/2005 has been received and entered. By the amendment, claims 2, 7 and 9 are now pending in the application.

Applicant's arguments with respect to claim 2, 7 and 9 have been considered but are moot in view of the new ground(s) of rejections as follow.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arakawa et al., US Patent No. 6,559,911, in view of Applicant's admitted prior art (APA).

Regarding claim 2, Arakawa et al., figures 4 and 9, disclose a liquid crystal display (LCD) device (20) comprising:

- . an LCD cell (30) having a liquid crystal layer;
- . a polarizing film (1);
- . a prismatic light control (6);
- . a light source device (21-24).

Arakawa et al., however, do not disclose a light scattering pattern providing on an emission face of the guide plate. It would have been obvious to one skilled in the art at the time of the invention was made to employ a light scattering pattern over an emission face of the

Application/Control Number: 09/288,217

Art Unit: 2871

Arakawa et al. guide plate as shown by APA's figure 2 (light scattering pattern 13c formed over the emission face of the guide plate 13) in order to promote light from a guide plate to an LCD cell.

Applicant's argument is Arakawa et al. has light diffusion element 23 formed on the back side of the light guide 22. The Examiner agrees it; however, the modification to the Arakawa et al., as stated above, would employ such light scattering pattern over the front side of the guide plate. In other words, the limitation of claim 2 met.

Allowable Subject Matter

3. Claims 7 and 9 are allowed.

The references of record neither disclose nor make obvious a reflective liquid crystal device comprising a combination of various elements as claimed, more specifically of the surface light source device and the projection rows of the prismatic element being separated by a distance of 0.5 to 1 mm as set forth in claims 7 and 9.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 09/288,217

Art Unit: 2871

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung Nguyen whose telephone number is 571-272-2297. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
